Webinar February 1, 2007

www.sam-lg.org

Today's Webinar

- Review Key Concepts: Effective Community Governance and Balanced Scorecards
- Community Balanced Scorecard Concepts with Examples and Basic Requirements
- *Detailed Example* including Citizen Roles & “Cascaded Scorecards” to Align Participating Organizations
- Communication & Feedback for Transparency, Accountability, & Community Learning
- Selected Resources
- Questions and Answers

Community Balanced Scorecard

- Combines the results-focused community building power of *Effective Community Governance* with the strategy alignment of *Balanced Scorecards*
 - Pulls the community together around common outcomes desired by citizens
 - Brings together decision makers and leverages assets from all sectors for shared results
 - Aligns key community collaborators behind a common strategy for faster, measurable results
 - Creates mutual accountability for results
- Used to address many important issues in communities and regions that cannot be resolved by one organization or sector.

Effective Community Governance Model

from *Results that Matter* (Jossey-Bass, 2006)

Align 2 or 3 "Core Skills" to Get 4 "Advanced Governance Practices"

Effective Community Governance: Key Themes

- Robust citizen engagement in multiple roles
- Use of performance feedback in organizational or community decisions
- Linking desired results to resources and accountable people or organizations
- Strong collaborations

Main Citizen Roles

Government and nonprofit balanced scorecards tend to view citizens as service customers. That's important, but citizens play many other roles in communities

Citizens as:

- **Stakeholders:**
- **Advocates:**
- **Issue Framers:**
- **Evaluators:**
- **Collaborators:**

Key Variations of Three Roles:

- **Customers**
- **Owners**
- **Interested Parties**

- **Foundation Builders** (e.g., set a vision, strategic goals, long-term outcome indicators)
- **Agenda Setters** (e.g., identify issues to address, budget or policy priorities, service targets)
- **Problem Definers**
- **Solution Identifiers**

- **Compromisers**
- **Co-producers**
- **Asset Leveragers**

For a full presentation on citizen roles see <http://resultsthatmatter.net/w-p>

Organizational Contexts for the Balanced Scorecard

- Business organization
- Government organization
- Nonprofit organization
- **Community collaboration**

• *Perspectives & strategies differ, and ways to develop scorecards vary,*

• *But a **unified leadership** can still drive the vision, align the strategy, and build accountability for scorecards for ALL types of ORGANIZATIONS.*

The game changes dramatically for a community, with many leadership groups & accountability structures.

Real World Example that Comes Close: Charlotte Collaborative Balanced Scorecard Strategies
 Adapted from City of Charlotte, NC, Strategy Map

Vision: Community of Choice for Living, Working, and Leisure

Strategy: Charlotte "Corporate Scorecard" STRATEGIC OBJECTIVES

Perspectives

- Neighborhood Cabinet *crosses more boundaries*, involving City & County department leaders.
- Neighborhood development strategy:
 - Engages citizens as issue framers & co-producers in their neighborhoods
 - Develops resident leaders thru the Community University
 - Bases decisions on quality-of-life data.

A Community Balanced Scorecard with Perspectives Similar to Traditional Scorecards

Community Strategy Map

- Cause and effect diagram of strategic objectives from engaging citizens to getting desired results
- Pictures of the community strategies for achieving major community outcome themes
- Selection of high leverage, high buy-in interventions, with key collaborators on board
- Critical interventions for critical success factors

Community Balanced Scorecard Sample Strategy Map

Perspectives

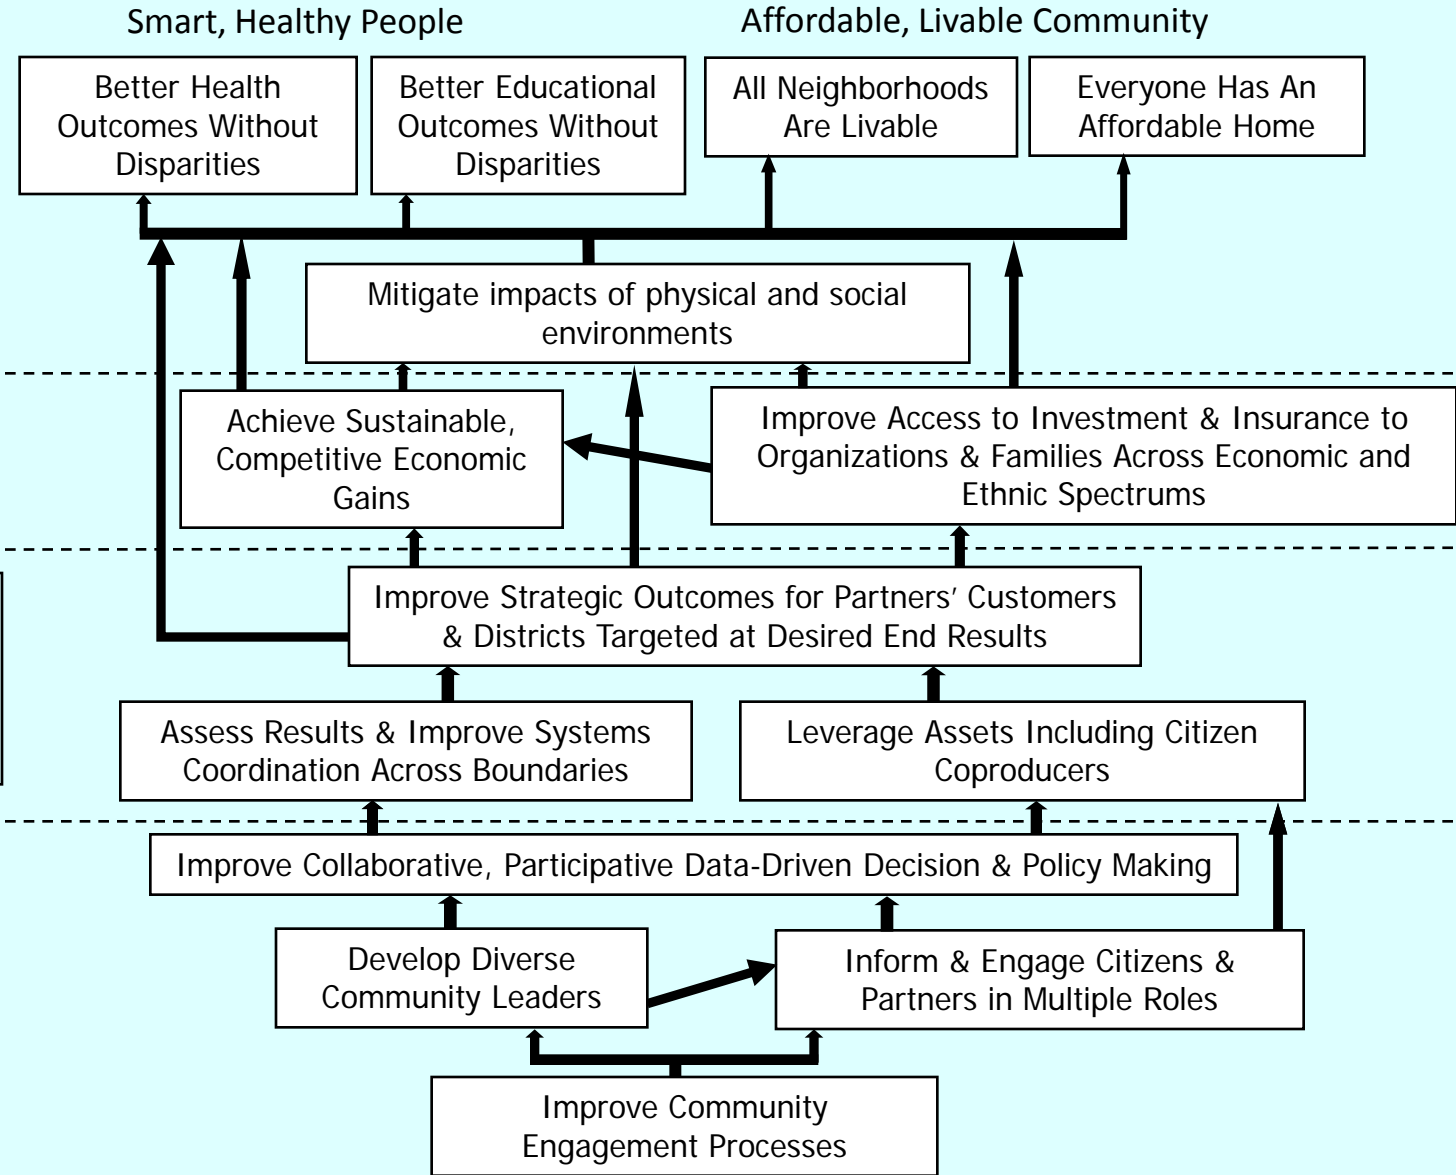

Community Priorities:
Desired End Results

Community Economy

Community Implementation:
Getting Things Done

Community Learning

Possible Strategic Objectives

Toward Community Balanced Scorecards

- Basic requirements to get started:
 - *At least 2 community partners, at least 1 an investor or implementer, at least 1 in touch with citizens*
- Optimum conditions for success:
 - *More partners, support citizens in multiple roles, mutually accountable collaborative relationships, decision makers engaged, data-driven decisions*
- Agreements among community partners to *clarify accountability* for implementation, and interim measurable results each is to achieve.

Truckee Meadows Tomorrow

“You make a difference. We measure it.”

Small civic group in Western Nevada that:

- Reports on regional quality of life
- Collaborates with citizens and organizations for tremendous leverage to improve the quality of life

Truckee Meadows Tomorrow:

- www.quality-of-life.org and Chapter 5 of *Results That Matter*, also:

<http://www.resultsthatmatter.net/site/model/truckeemeadows.php>

http://www.resultsthatmatter.net/site/model/tmt_summer.php

Truckee Meadows Tomorrow

- TMT emerged from a public-private initiative to develop [Quality of Life indicators](#) in 1991-93 with:
 - 1,100 citizens engaged as **stakeholders** answering surveys
 - 2,000 citizens engaged as **issue framers** in a variety of deliberative forums
- In 1998 and 2005-06, indicators revised through consultation with user groups and citizens
- *Community Well Being* reports on regional quality of life issued since 1994 put TMT member volunteers in role of **evaluator**
- [Adopt an Indicator](#): Citizens take ownership of specific indicators to initiate and maintain volunteer efforts
 - TMT member-volunteers are citizen **advocates**
 - Indicator adopters are citizen **collaborators (coproducers)**
- TMT members take a positive approach to advocacy, **celebrating role players' contributions** through “Accentuate the Positive” events, awards, receptions, use of media.

Truckee Meadows Tomorrow: Quality of Life Compacts

- Written agreements between TMT and one or more partner organizations in the region (government, nonprofit, or business) who are implementers or investors.
- Specify priority Quality of Life outcomes the partner organizations will contribute to improving.
- Specify goals, action initiatives, and measures the partner organizations will be accountable for.

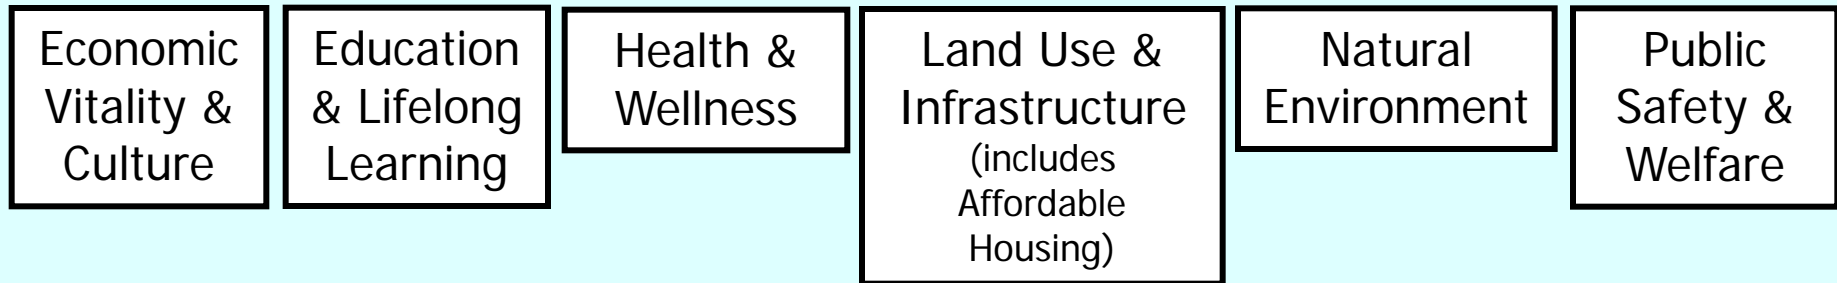

Community Balanced Scorecard Precursor

- TMT’s [Quality of Life Indicators](#) and [Quality of Life Compacts](#) come close to a Community Balanced Scorecard
- “Leading” compact measures assumed to influence “lagging” TMT Quality of Life Indicators.
- What might the perspectives and a strategy map look like if TMT and its compact partners used a *Community Balanced Scorecard*?
 1. Community Priorities
 2. Community Economy
 3. Community Implementation
 4. Community Learning

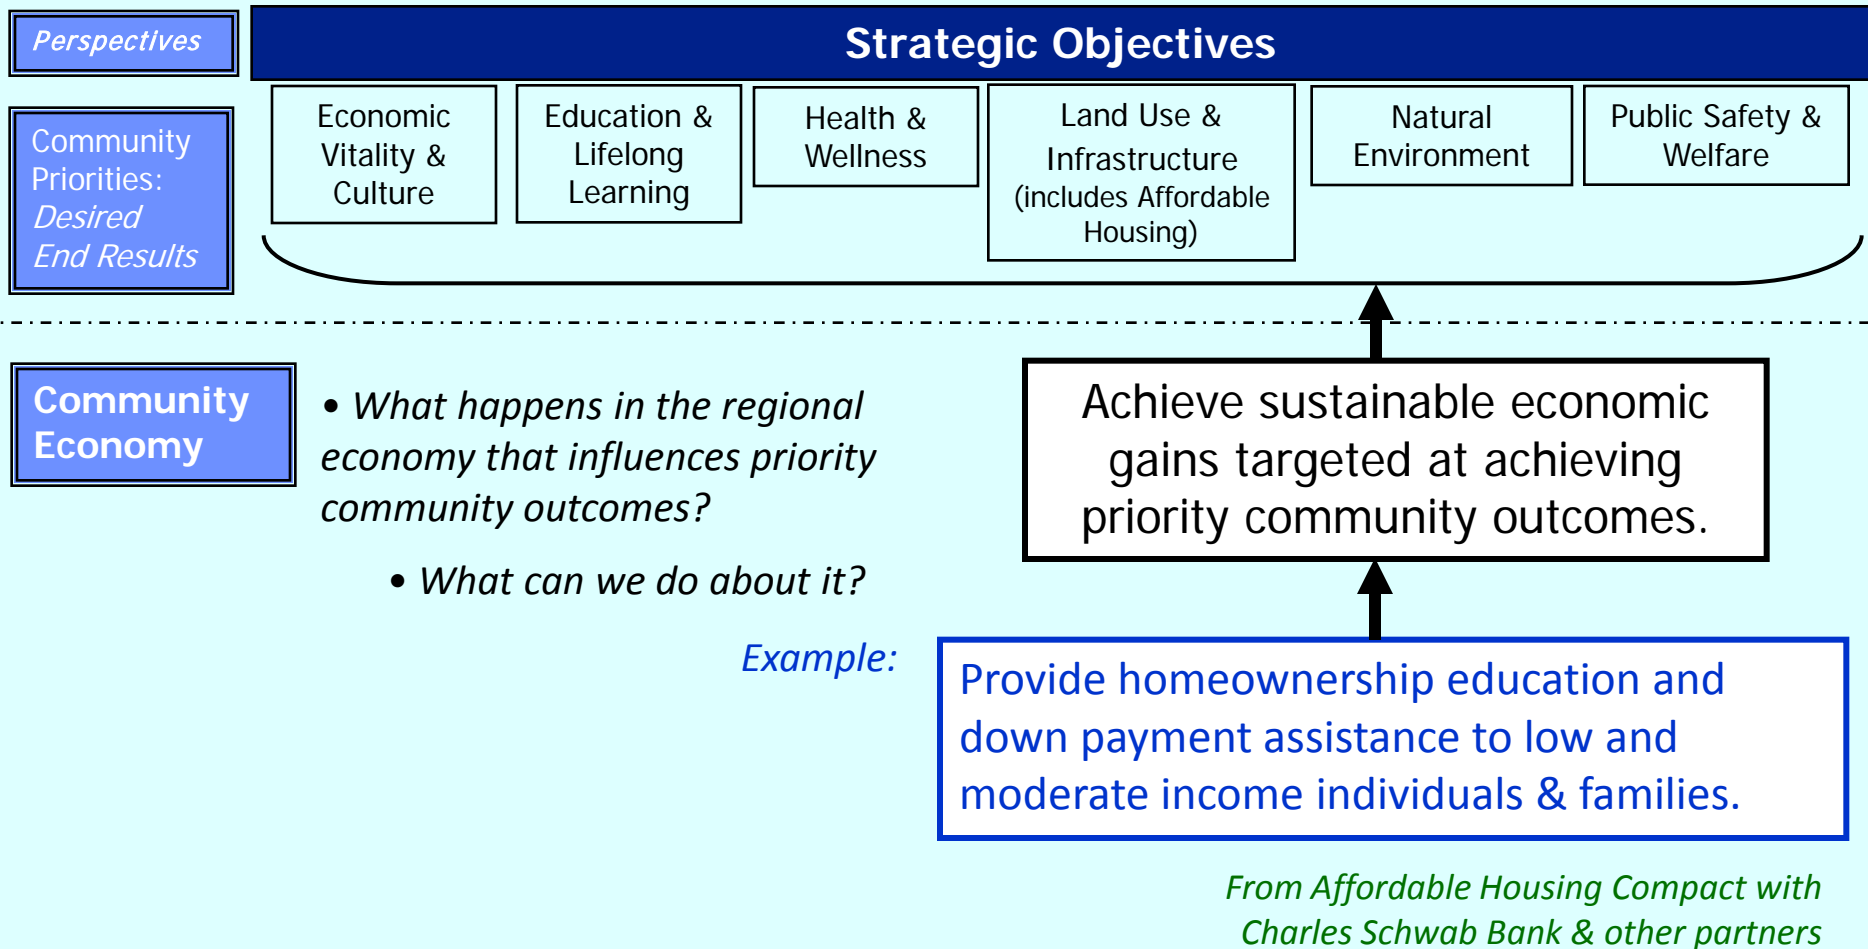

Truckee Meadows Tomorrow: Perspective 1: Community Priorities

Strategic Objectives: The 6 Categories of TMT's Community Well-Being Report

- TMT's six quality of life categories provide the basis for strategic objectives for this perspective of a community balanced scorecard.
- These priorities were derived from consensus building processes engaging citizens and organizations in the region on important desired results.
- Community processes also defined *Quality of Life Indicators* for each priority to provide ways to measure desired outcomes ("lagging indicators").
- In extending the experience to a Community Balanced Scorecard, community partners would assume *joint accountability* for jointly produced outcomes.

Truckee Meadows Tomorrow: Perspective 2: Community Economy

Truckee Meadows Tomorrow: Perspective 3: Community Implementation

- Most **compact goals** can be **strategic objectives** in the *Community Implementation* perspective. Some can be in *Community Economy*.
-Linked by cause-&-effect assumptions to community priorities.
- Compact **initiatives** and **measures** would populate these objectives.
-Partners take *individual accountability for the initiatives & measures*.

Truckee Meadows Tomorrow:

Perspective 4: Community Learning

- Citizens (TMT members) currently learn from past experience with compacts how to:
 - *Advocate* for new Quality of Life Compacts
 - *Collaborate* in negotiating new compacts.
- Potential future learning:
 - More thorough evaluation and review of compact benefits and practice to facilitate more effective practice in the future.
- Citizens would then also play:
 - *Evaluator* roles in determining compact benefits.
 - *Issue-framer* roles in reframing issues based on findings, improving compacts going forward.
 - Stronger *advocate* roles by using findings to encourage compacts with more partners.

Potential Truckee Meadows Tomorrow *Strategy Map* for Quality of Life Compacts

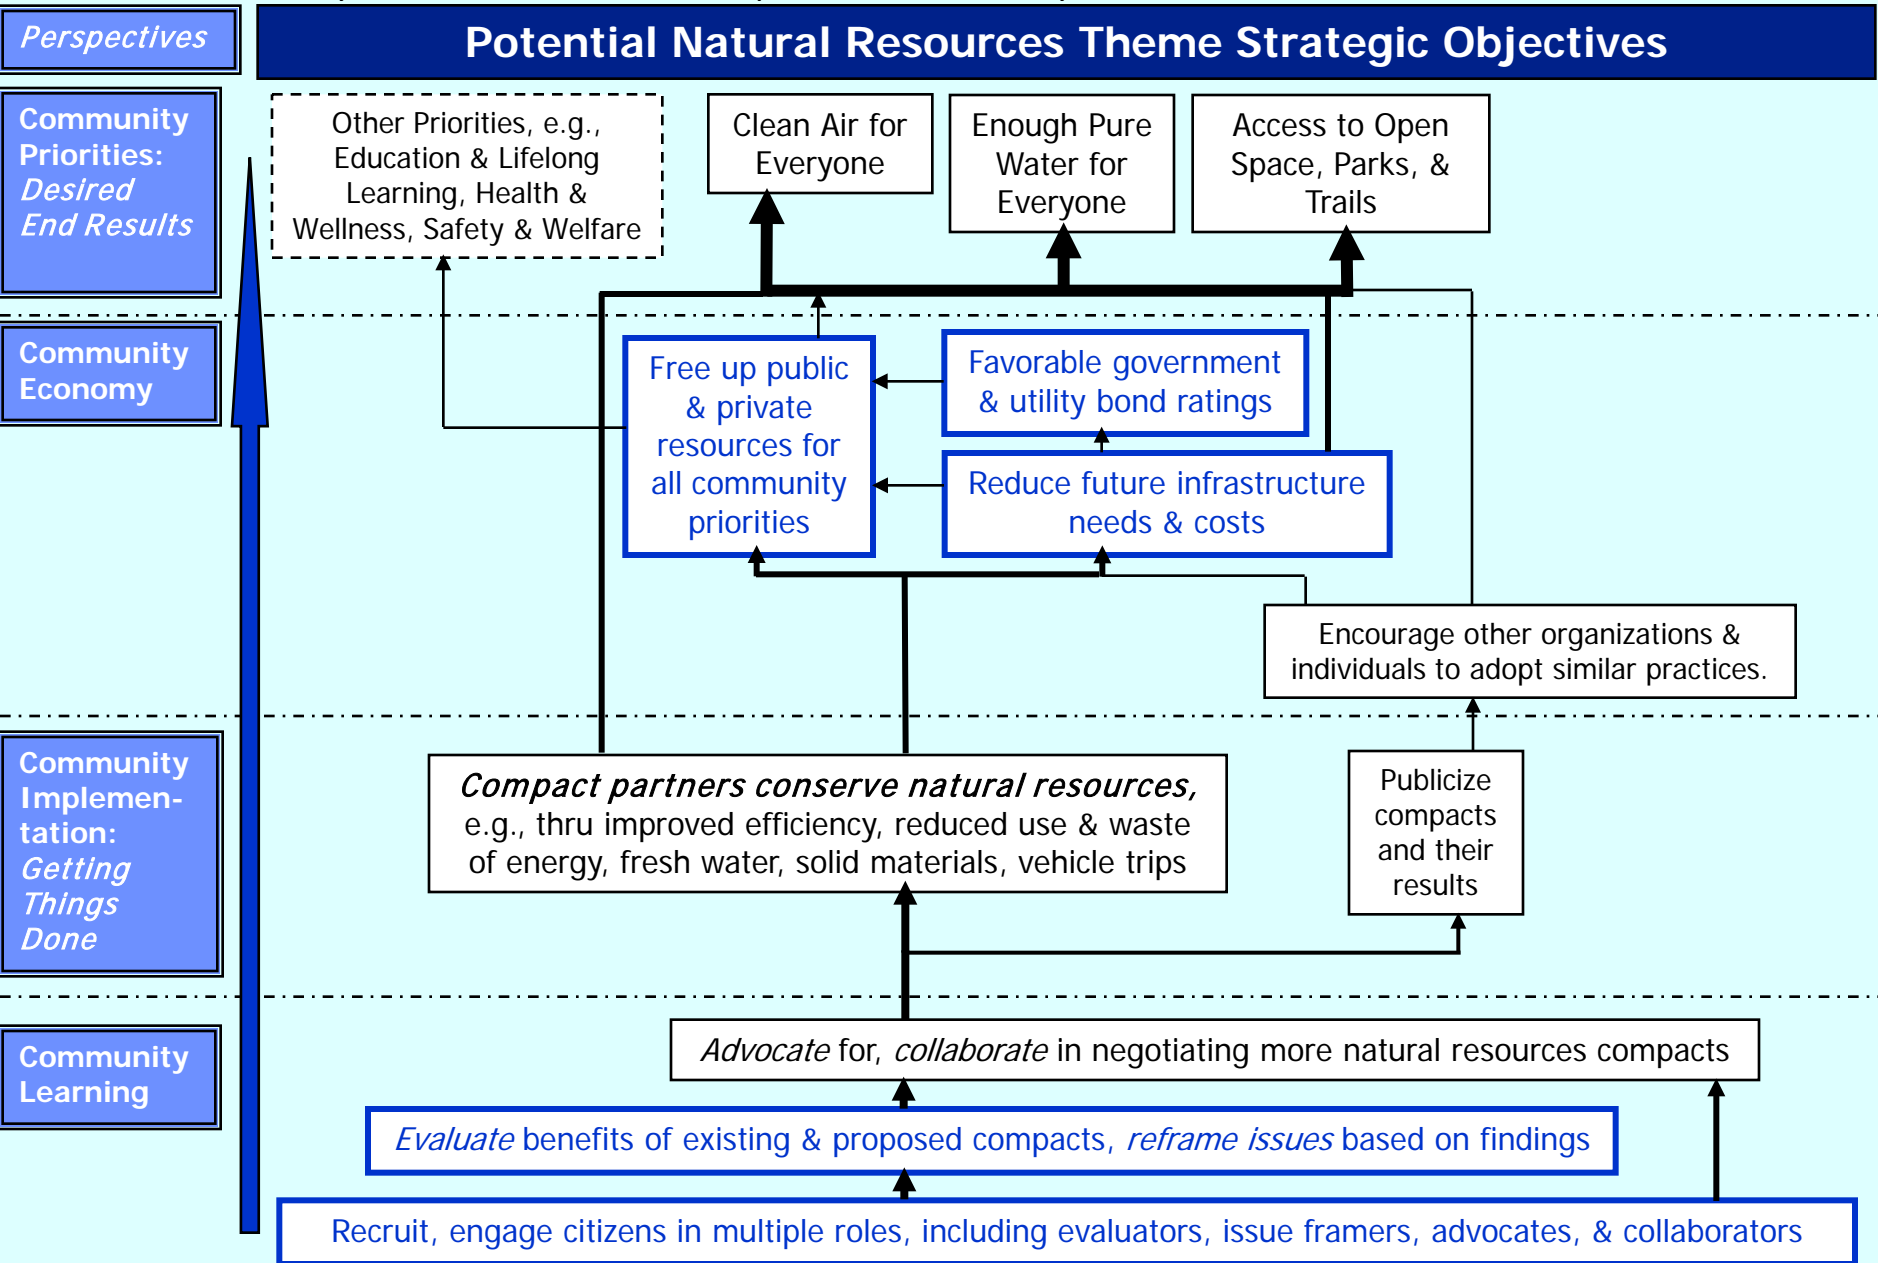

Truckee Meadows Tomorrow: Sample Strategy Maps Based on a Real QoL Compact

- How the 2001-2002 TMT-Washoe County Natural Environment Compact could look on a strategy map, as it was actually implemented.
- An expanded version of the strategy map for a potential broader Community Balanced Scorecard on a **“Natural Resources” *theme***.

TMT-Washoe Co. Natural Environment Compact, on a Strategy Map, as Implemented:

Potential Scenario of Community Balanced Scorecard on Natural Resource Conservation

Participating organizations:

- County and participating municipalities
- Power Company
- Community based organizations and schools
- Builders and Developers Association
- Chambers of Commerce
- Public-private Economic Development Agency
- Truckee Meadows Tomorrow

Mechanisms for Alignment, Transparency, Accountability, & Learning

- *Cascading the strategy map* among community organizations to strengthen alignment.
- *Communication plan for transparency* of how all partners do their part, and to assure *accountability*.
- *Feedback of results* and review by partners and citizens (playing several roles) for *community learning* to sharpen the strategy and how it is implemented.

Triple Loop Learning

Performance
Feedback Cycles to
Keep
Improving

- Cycles for:**
- Organizational Learning
 - **Community Learning**

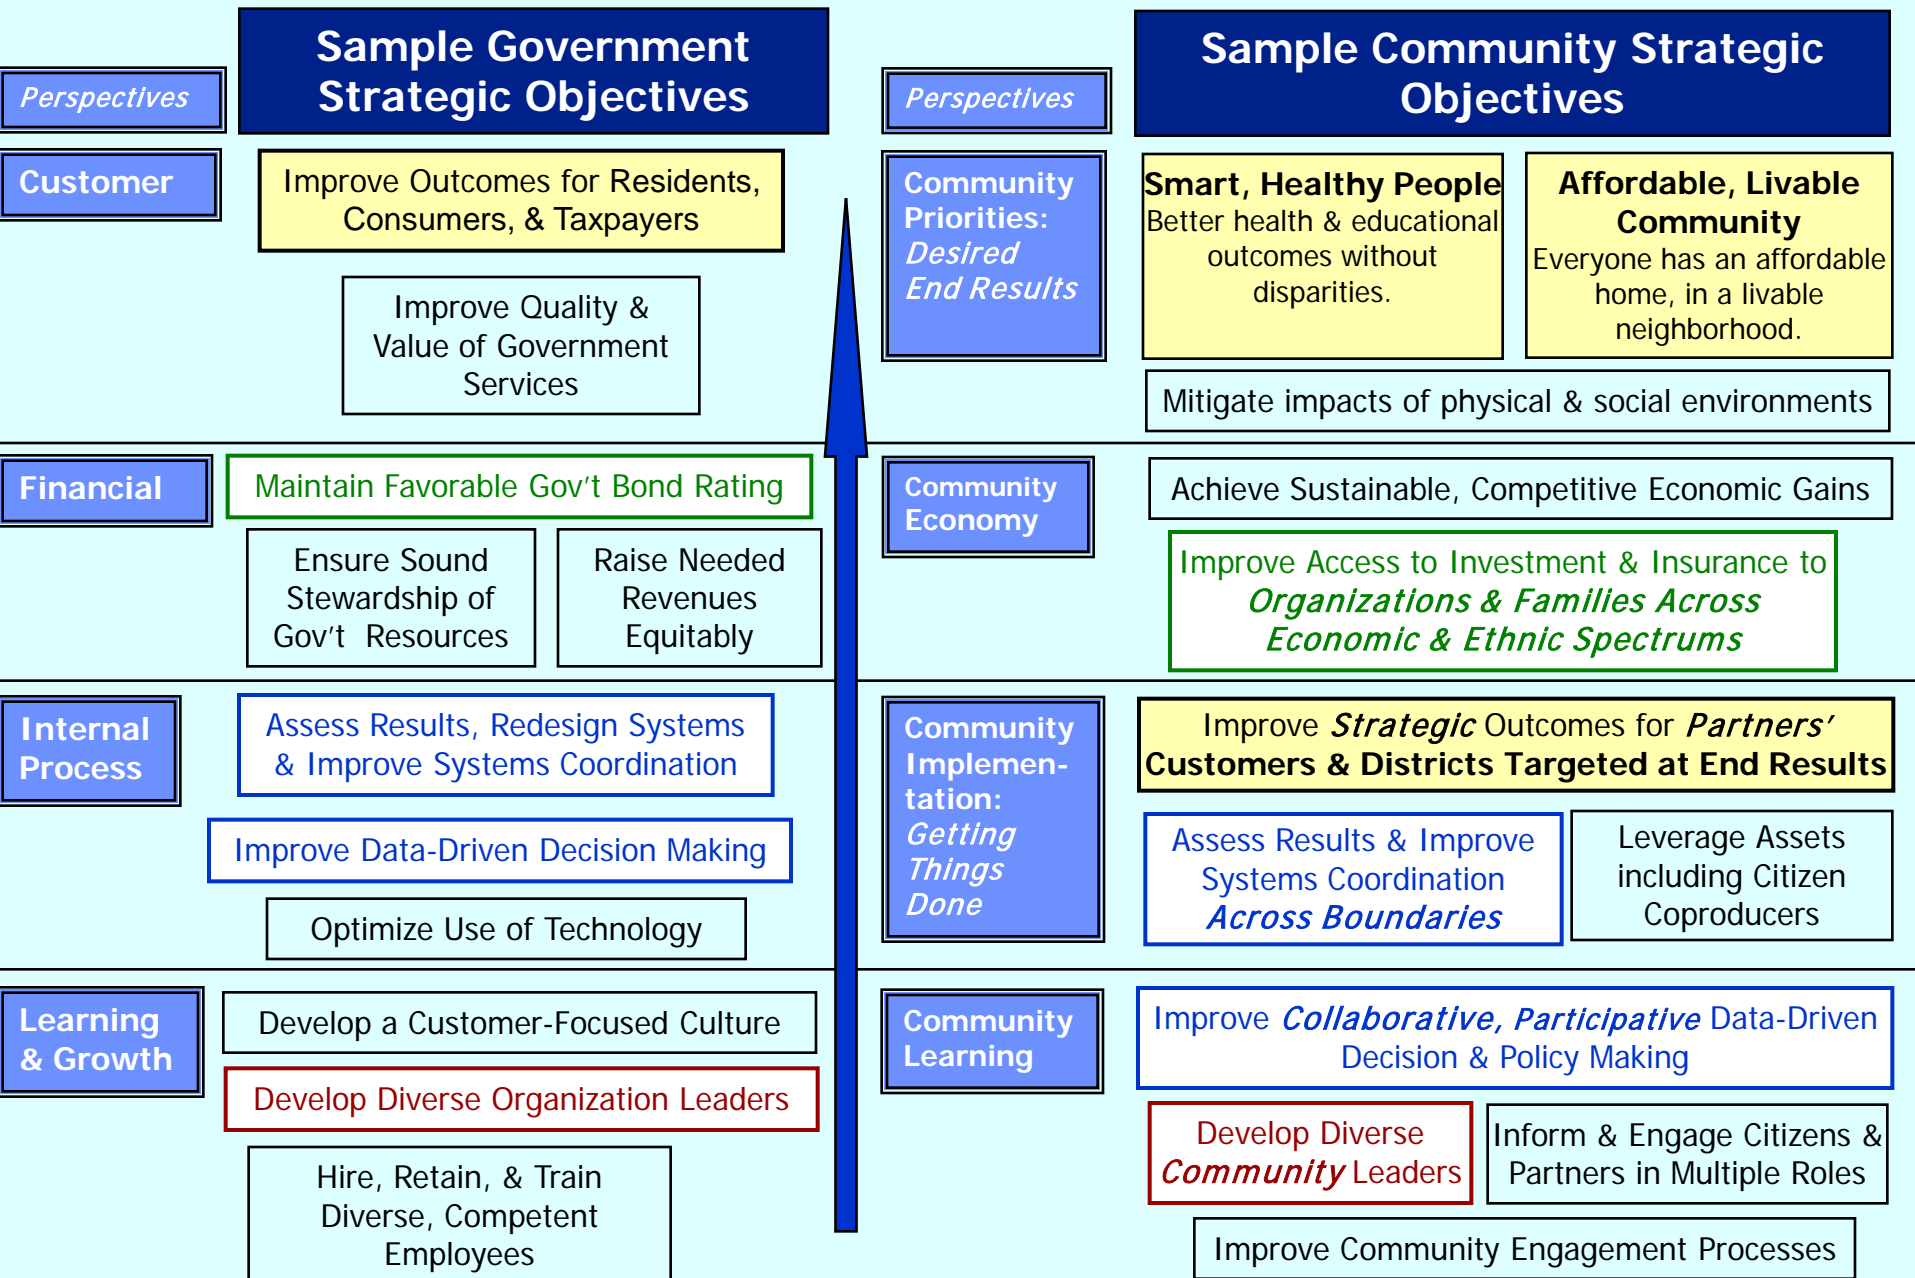

Collaborative Practices Essential

- Partners agree on shared purpose involving citizen-tested goals and outcomes all want to achieve.
- Decision makers are at the table whenever needed, in fact or by real delegation—no waiting to confirm agreements.
- Partners each commit to open communication and accountability for their own actions and measured results.
- Partners are accountable to each other and to the community.
- “Facilitative leadership” and “network leadership” styles more important than “command & control.”

Collaborative Community Learning

- Need commitment to “mutual learning approach” among partners and engaged citizens, e.g.:
 - Make differences among participants opportunities for learning, not win-lose situations:
 - Focus on interests, not positions
 - Combine advocacy and inquiry
 - Test assumptions (consistent with balanced scorecard) including hidden assumptions and inferences
 - Jointly define problems and design solutions
- Openly share information & review each others’ results to “close the loop” of community learning.

Differences from Typical Government Scorecard Strategy:

Community Balanced Scorecard: Next Steps

- Demonstrations in communities that combined Effective Community Governance and Community Balanced Scorecard tools: ***Partners Welcome***
- Identification of tools and tactics to increase the likelihood of successful applications and achieve results that matter for communities
